## OPERATION, CARE AND MAINTENANCE

### OPERATION

Operation of the blind is through a chain system located either side of the blind. It complies fully with all relevant child safety standards. Our blinds come with a wall secure system which prevents chains from becoming loose when not in use or a breakaway connector system.

### CARE INSTRUCTIONS

To keep your blinds looking their best for years to come, always ensure that they have been securely fitted, use a synthetic or feather duster and refrain from using soap and water. Should any part of the blind fail please contact our dedicated Customer Service team who can help.

### MAINTENANCE

All our blind components are manufactured to the highest quality. They do not present any corrosion problems in normal environments. The system has been designed for smooth operation, together with rigidity to prolong the window blind's working life.

---

## CHILD SAFETY

Being a family run business, we know the importance of safety in a home. That's why every one of our designs fully comply with the latest European directives. Our blinds which are chain operated come with a wall secure system which prevents cords from becoming loose or a breakaway connector system.
